

Rounding

5 or more: round up
4 or less: stays the same

Round to the nearest ??????????

- Find the number in the place value you are asked to round to (ones, tens, hundredths, etc)
- Look at the number in the place value to the **right** of it
- If this number is 5 or more round up
- If this number is 4 or less stays the same

Examples:

- A. Nearest tens $1265 \rightarrow 1270$
- B. Nearest hundreds $957 \rightarrow 1000$ $723 \rightarrow 700$ $10674 \rightarrow 10700$
- C. Nearest thousandths $0.3472 \rightarrow 0.347$ $1.11223 \rightarrow 1.112$ $22.9999 \rightarrow 23.000$
- D. Nearest tenths $0.34 \rightarrow 0.3$ $1.1122 \rightarrow 1.1$ $22.951 \rightarrow 23.0$
